

# Plant trees!!

## Why??

because if we don't plant trees  
The water in many places will get higher  
So there is a thermometer that shows  
us how good the world is

Fact Fact: Roots and shoots went to

See a person talk to them and he  
told them about one of their latest times  
they went to Antarctica and the visitors  
were in talking and they had taken off  
all of their jackets and they were not cold
